

Marketplace Technical Foundation - [Car-Rental Website]

Day 4 Implementation Report

Created By: Muniza Nabeel

Roll Number: 258857

Introduction

The **CarRental Website** is a user-friendly platform designed to make renting cars easy and efficient. It connects customers with rental car providers, offering a wide variety of cars to suit different needs and budgets. Customers can browse, book, and track their rentals seamlessly through this digital marketplace.

Marketplace Features

The **CarRental Marketplace** offers the following functionalities:

- A comprehensive selection of cars with detailed information.
- Filtering options by categories, pricing, and specifications.
- Secure booking with multiple payment methods.
- Real-time updates on car availability and rental tracking.

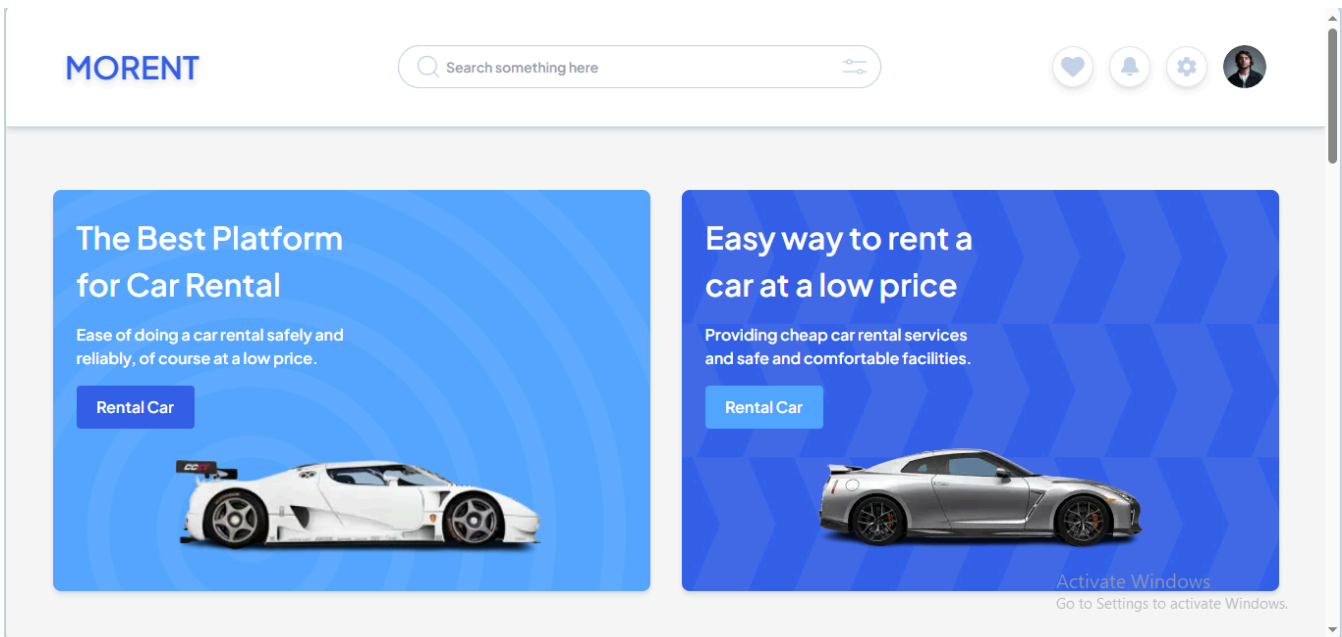

Dynamic Routing

Dynamic routing is implemented to improve navigation and user experience. Each car and booking has its own unique route, making information easy to access and manage.

Pages Overview

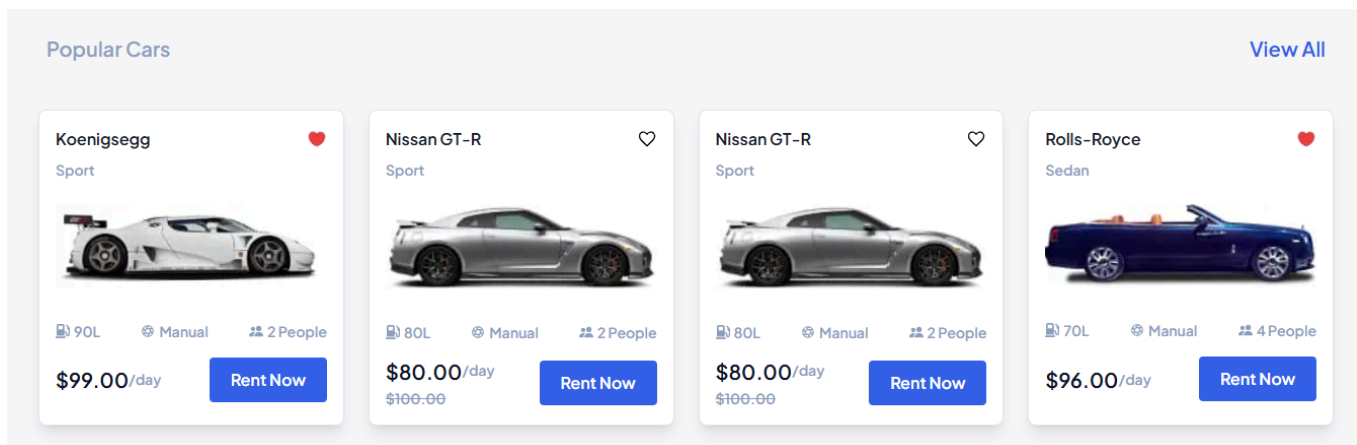

Home Page

- Displays featured rental cars and a "Rental Car" button for quick access.
- Includes a section for Pickup and Drop-off details.

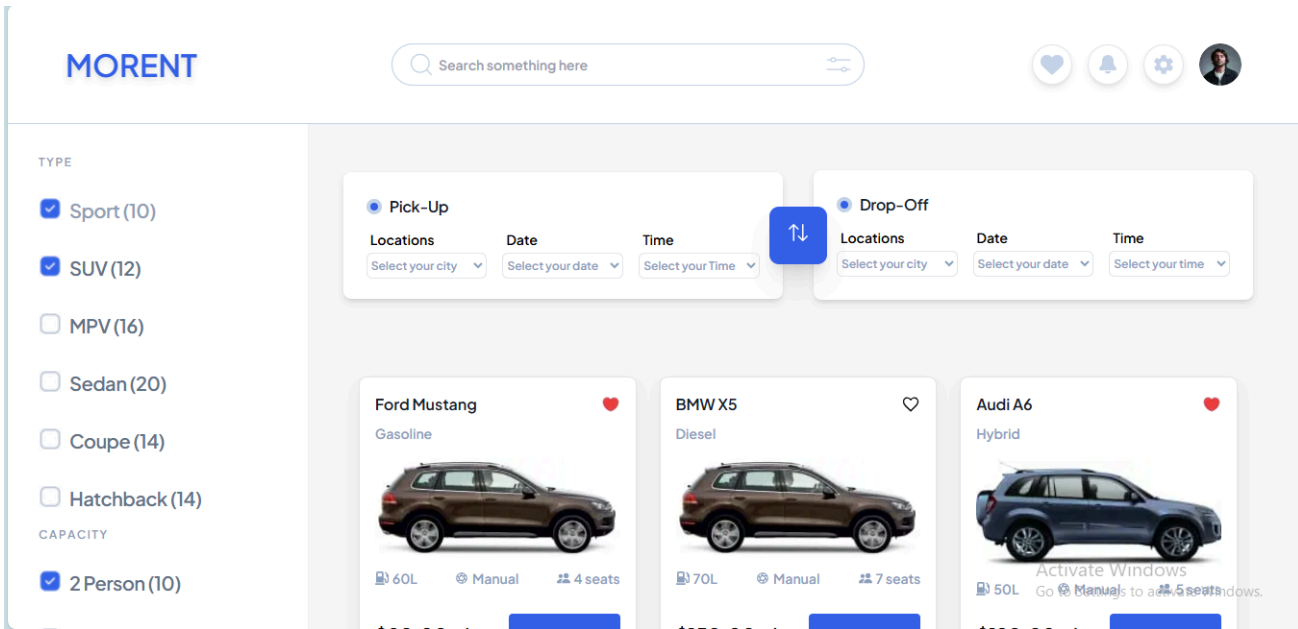

Popular Cars Page

- Shows detailed information about popular cars, including their model, fuel type, seating capacity, and images.
- Includes pricing details and a "Favourite" button for bookmarking.

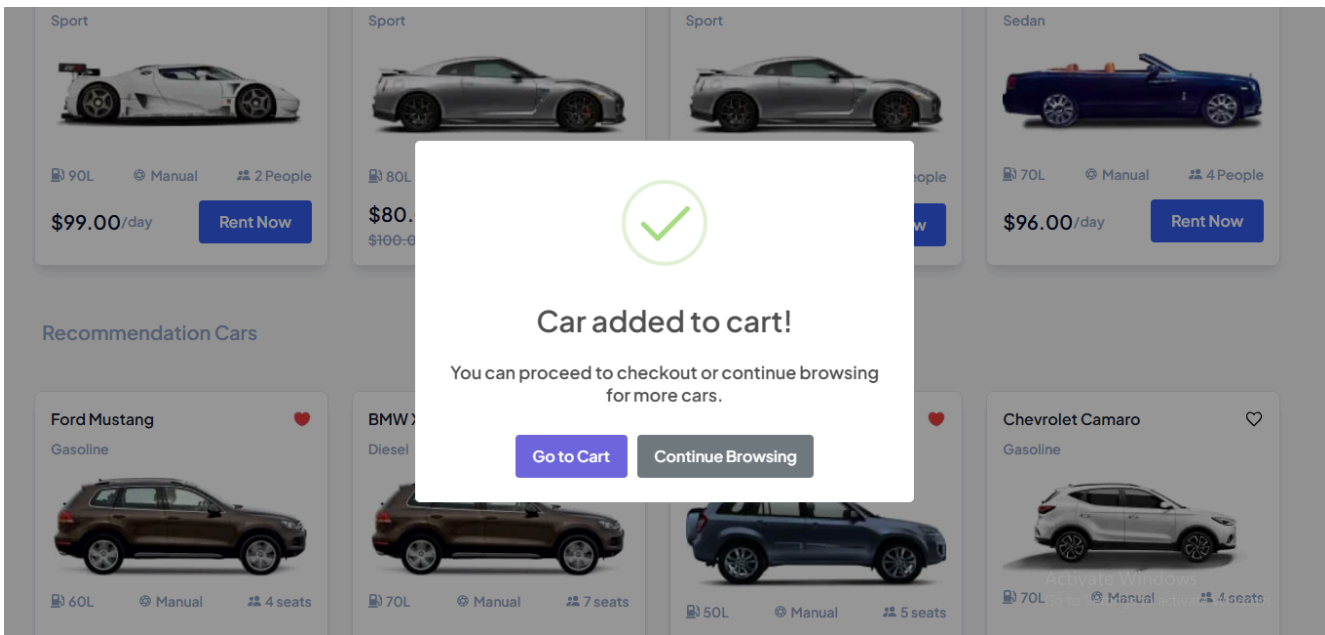

Categories Page

- Displays cars categorized by type, fuel type, and price in a responsive grid layout.
- Offers a "Rent Now" button for easy booking.
- Features a dedicated **Pickup & Drop-off** section for users to specify rental preferences.

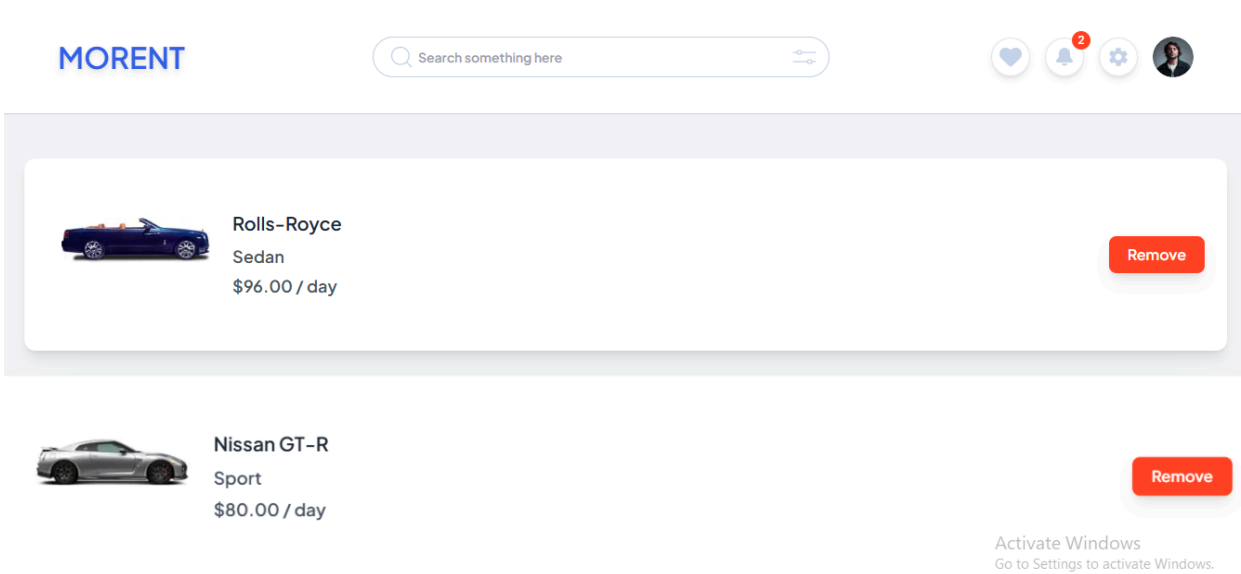

Popup Heading:

"Car Added to Cart Successfully"

Cart Page

- Lists selected cars along with rental dates and charges.
- Allows users to add or remove cars from their cart.

Checkout Page

- Provides payment options (credit card, PayPal, Bitcoin) and rental details.
- Includes billing information and a "Rent Now" button after accepting the privacy policy.
